

Your child will be entering 2nde International or 1°IB in September, and will be following a pre-IB or IB diploma course.

A graphics display calculator (GDC) is compulsory in Mathematics and Science courses. Students will be at a disadvantage if they do not have access to a suitable GDC. It is necessary for your child to have one with him/her from the start of the 2ndeINT year in order to quickly familiarize him(her)self with the instructions and features.

Here is a list of approved models:

The Math and Science departments *strongly recommend the following Texas Instruments (TI) models.*

Texas Instruments:

- *Ti 83 plus, Ti 83 plus silver edition, Ti 83 premium CE*
- *Ti 84 plus, Ti 84 plus silver edition*
- *Ti Nspire (non-CAS) with 84 faceplate*
- *Ti Nspire (non-CAS) versions 1.3 or higher updated to the latest operating system in "press to test » mode.*

Any of these calculators can and will be used all the way through the Terminale IB and the final exam.

Best Wishes

S Hurley, S Coursaget and J Parent
